

WHAT IS MULTIMENU+?

 MultiMenu is a smart tool that enables customers at shops and restaurants to monitor and order through a desktop device with no need for a waiter, and also features a charging unit for mobile phones and tablets.
Ads will run on the display when device is not in use.

OPPORTUNITIES

- Menu display (Remote update enabled)
- Ordering system
- Charging unit
- Ads & Campaign video broadcast
- Shop management panel

(Pre-accountancy, Table operations, Stocks, Statistics)

+Device-Aided Express Payment at the table (Coming soon)

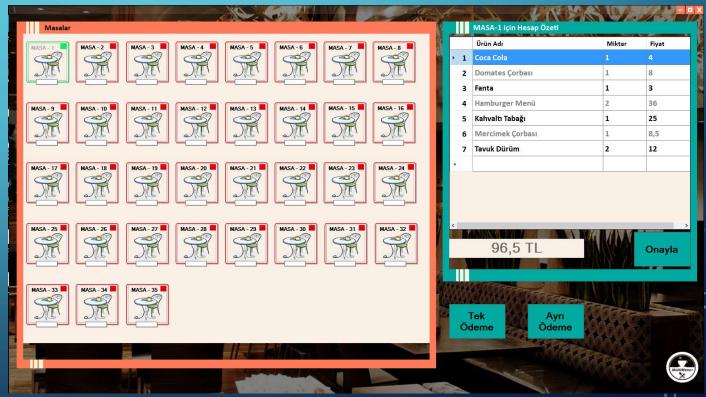

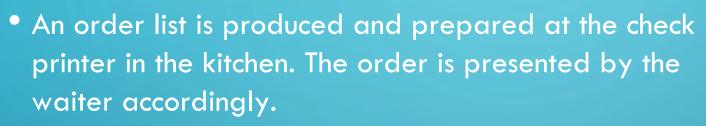

MENU & ORDERS

Customers can now monitor the menu through a desktop device without needing a waiter, make their order list and send it to the system.

 Orders are automatically transmitted to the host PC. They are monitored if and when needed.

• Orders given may be monitored by customers.
